

Introduction: BRE & BREEAM

Dr Josephine Prior; Principal Consultant

Building a better world together

We are:

- International
- multi-disciplinary
- building science organisation
- mission to improve buildings and infrastructure
- research, knowledge and application

Research the built environment

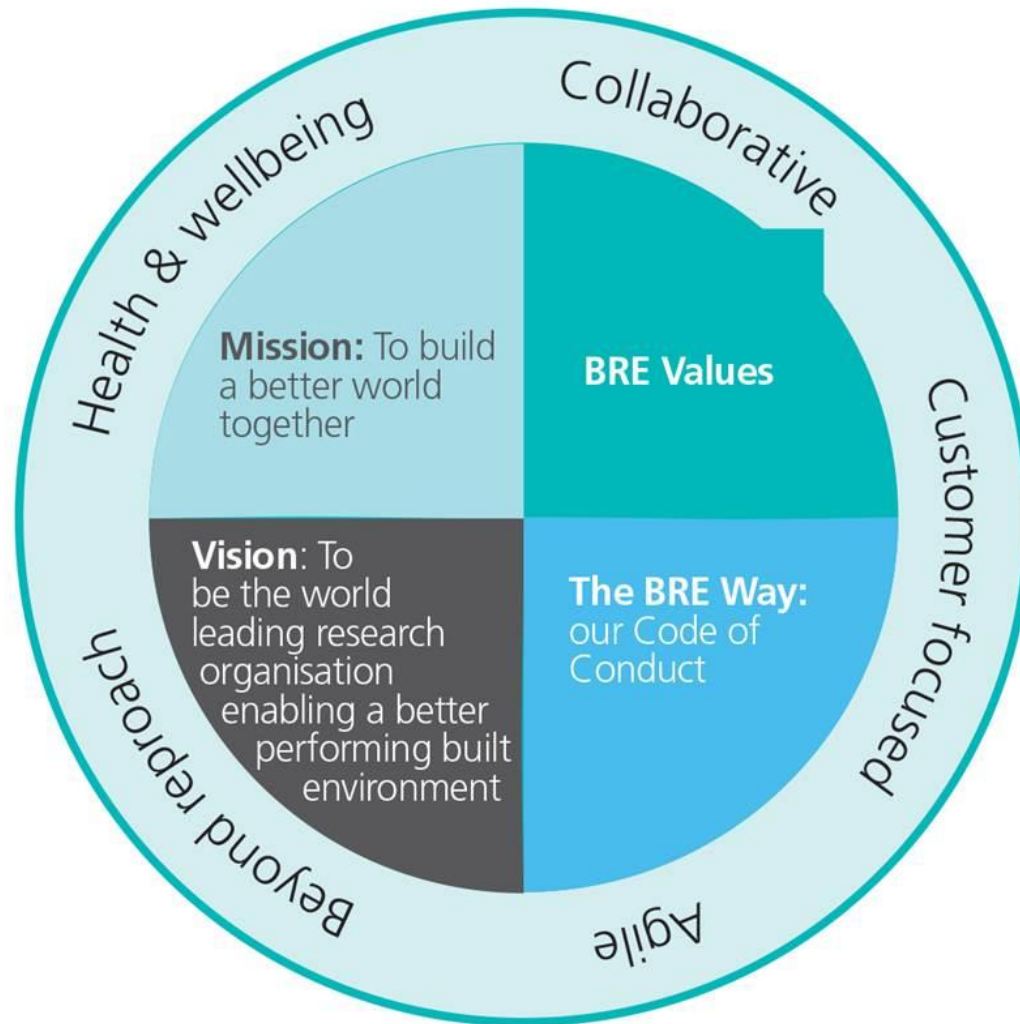

Sustainability in built environment

Collaboration with government and private sector

Safety, security and performance in built environment

Set, monitor and certify performance standards for buildings and infrastructure

Worldwide leadership in building science

Our scale and reach

80

Countries

Where BRE products and services are used

5

BREEAM National Scheme Operators in Europe

3,000

BREEAM and code assessor partners

35,000

People

trained by BRE

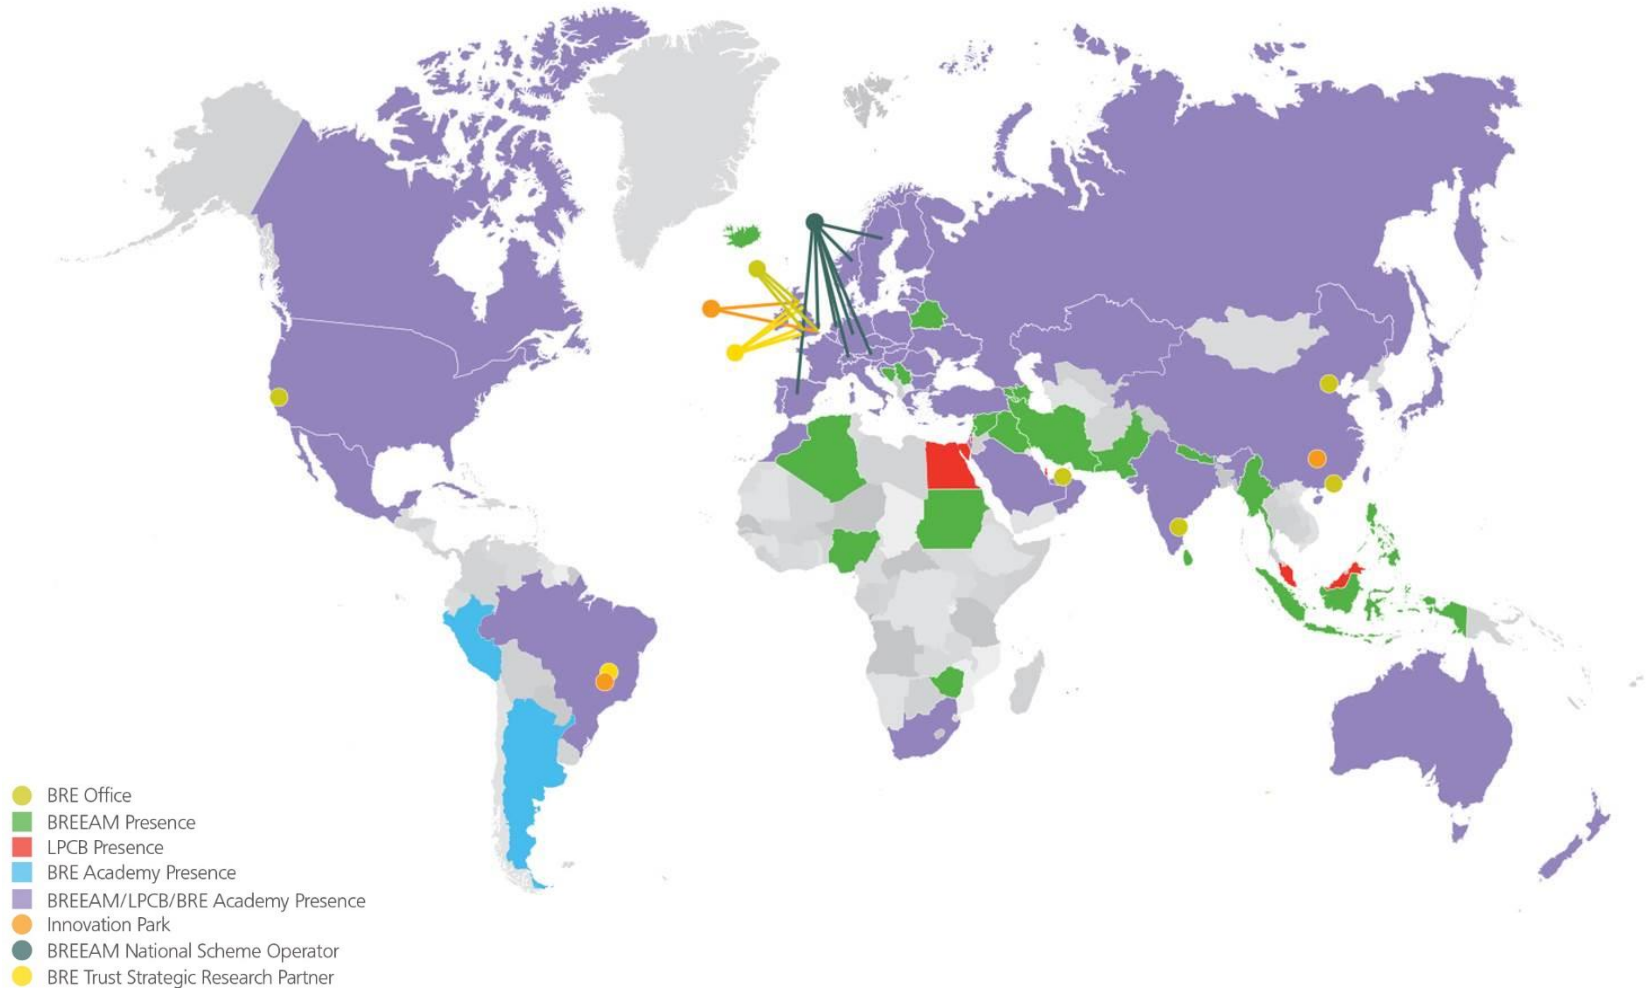

630

people directly employed by BRE

26m

Data records held on UK housing stock

Where in the world are we?

- cutting edge collaborative research
- digital products, services, standards, qualifications
- worldwide reach
- positive change in the built environment

Sustainability

Safety & Security

Knowledge

Innovation

Networks

- BREEAM was first environmental standard for buildings in the world
- BREEAM certifies sustainability of buildings, community development and infrastructure
- BRE helps reduce the environmental impact of construction processes, materials and operations

**“ 40% of carbon missions
are derived from the
world's buildings.**

BREEAM

- recognised worldwide
- measure of sustainability
- helps improve sustainable performance and value of assets
- > 2 million buildings have been registered around the world.

www.breeam.com

CEEQUAL

- Delivers more sustainable infrastructure projects
- specification, design, construction civil engineering works
- assessment system for project and contract teams
- sustainability rating

www.ceequal.com

The new national quality mark
providing impartial information on the
quality and sustainability of new homes

www.homequalitymark.com

- We help our customers protect people
- fire and safety: products standards and assessments
- LPCB (Loss Prevention Certification Board)
- market leader in fire and safety approvals
- Redbook live online catalogue
- lists >14.5k products meeting our safety and security standards

“ Homes, buildings and communities need to be safe as they are built and occupied.

Safety & Security

Knowledge expertise you can trust

- BRE Bookshop and briefing papers
- Scientific insights drive BRE standards
- Research and knowledge made available
- BRE Academy training and qualifications
- to apply BRE standards
- Tools save lives and time
- SiteSmart monitors and reports on health, safety, process and environment

Innovation expertise you can trust

- BRE has Innovation Parks in the UK and abroad
- Research in the built environment
- Raising standards in construction
- Testing diverse and novel products
- Collaboration between BRE and others

Innovation

Networks you can trust

- BRE researchers, innovators, certifiers, testers, educators, trainers, accreditors, publishers inform best practice
- BRE provides trustworthy advice and information
- Private sector and government clients worldwide
- BRE networks of assessors and ambassadors
- Constructing Excellence

Networks

Across the construction lifecycle
